Applicant's submission filed on 09/02/2009 has been entered.

Information Disclosure Statement

Regarding the information disclosure statement filed 09/03/2009, the official communications listed on the IDS have been considered, but have been lined through so as not to be listed on the face of the issued patent because they are not published prior art.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 14, and 24, the prior art, U.S. Patent No. 6,067,548 to Cheng, discloses Cheng teaches associating workflows in an organizational model with a domain using a unique identifier (col. 11, l. 59- col. 12, l. 27). Cheng teaches a method for using workflows in an identity system, using virtual links to associate a workflow with a group that includes a target identity profile (col. 3, l. 15-col. 5, l. 16). Cheng teaches that the system has organizational objects which are sub-groups of the enterprise, such as employees and departments (col. 6, l. 40-col. 7, l. 67). Cheng teaches that the organizational model of the system can be applied in workflow systems, by using the roles to assign tasks in a workflow system (col. 13, l. 9-col. 16, l. 10; col. 16, l. 10-65).

SiteMinder Policy Server Operations Guide, Version 4.0 ("SiteMinder"), Netegrity Inc., p. 1-556, discloses a policy server, i.e., identity system, for associating workflows, i.e., rules for user interaction with system resources, with policy domains (p. 235-237) by using SiteMinder responses and entities (Chapter 11, p. 302-304) and creating policies, i.e., workflows, to specify actions that should take place when users access specific resources, which are tasks and/or software within a domain that includes entities, i.e., groups, associated with identity profiles (Chapter 12, Policies, p. 325-328). Specifically, SiteMinder teaches that a policy domain is a logical grouping of resources

associated with one or more user directories, i.e., one or more users of the system (p. 235, par. 1; p. 235).

Applicant's arguments, see Remarks, filed 09/02/2009, with respect to Cheng (Remarks, p. 11-12) have been fully considered and are persuasive. In particular, applicant argues that while Cheng discloses an organizational model for modeling workflows abstracted from application logic, Cheng does not disclose associating workflows with a domain or workflows that perform the same tasks associated with different domains (see Remarks, p. 11).

Further, applicant argues that SiteMinder does not cure the deficiencies of Cheng because SiteMinder discloses controlling user access to resources in a policy domain, but SiteMinder does not disclose associating workflows to perform a requested task affecting an identity profile (see Remarks, p. 12-14).

Applicant's arguments are persuasive, and therefore it would not have been obvious to one of ordinary skill in the art at the time of the invention to combine Cheng with SiteMinder to arrive at the instant invention, since for the reasons above, neither Cheng nor SiteMinder disclose the combination of features claimed in independent claims 1, 14, and 24, and in particular, "...associating each workflow of a plurality of workflows with a corresponding domain of a plurality of domains in an identity system, each domain of said plurality of domains comprising one or more entities and each workflow of said plurality of workflows using different predefined set of steps to perform the task;..." (see Claim 1, l. 2-6).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
